Hi everyone,

My name is Rachel Locke. Nick Drury, Renato Guerrieri and I graduated last year and have been working as part of McKay Urology and Levine Cancer Institute, all parts of the genitourinary section of Carolinas HealthCare System, since May.

Davidson College and CMC’s McKay Department of Urology have collaborated since 1998 through the Davidson Research Scholar Program. Over the years we have hired 1 to 3 post grad students to work 1 to 2 years within different aspects of our urologic practice before moving on to medical school. Almost all of the scholars are now physicians and two of them are practicing urologists, an extraordinarily competitive specialty.

Offering both research and clinical experience, the scholar position allows for a great exposure to multiple aspects of healthcare. This year, we are seeking two scholars: one to work with Dr. Michael Kennelly in bladder dysfunction research and a second to work with Dr. Earl Burgess in GU medical oncology.

Some of the main duties of the positions include:
- Collaborate with urologic teams in clinical research and writing papers for publication
- Provide administrative and logistical support to research projects and ongoing clinical trials
- Manage large volume datasets, review patient charts and oversee data collection
- Lead patient education and assist in patient recruitment for clinical trials
- Shadow providers in the office and OR

We are seeking individuals who are motivated, self-directed, self-sufficient, fast-paced, possess the ability to multi-task, are planning for a medical career, and have experience with Microsoft Office. The successful applicant will gain experience in clinical trial implementation, clinical research, and patient relations, and authorship is anticipated commensurate with level of participation.

If you would like to apply please send a resume and cover letter to rachel.locke@carolinashealthcare.org by March 1st. Interviews will be conducted in March/April. Due to time restrictions, all applicants may not be interviewed. If you have any questions or would like a more extensive description of the position, we would be happy to help.

Best,

Rachel A. Locke, BS
