

How to Read the Course Schedule

This stands for Course and Section. Most courses are offered once during the semester and are listed as section 0. As seen with Physics, when courses are offered at multiple times, their sections are indicated with letters.

A common question is, "Can a first-year take a 200- or 300-level course?" and the answer is yes, but look for the PRQ note. This means there is a prerequisite and that information can be found in the course description. Click ">" to view the description.

The CRN or Course Reference Number is what is entered into WebTree when selecting courses. It is also used when adding and dropping courses using during the Add/Drop period.

Notice the two meeting times for PHY 310. For sciences, this indicates a separate lab. For non-sciences, this could indicate a second room has been reserved. These are always listed second, below the lecture.

These are the meeting days. "R" represents Thursday.

These are the instructors. If "Staff S" is listed, it indicates the course is being offered but does not yet have a professor assigned.

Notes provide additional information about classes. "12+" indicates the section is only open to first- and second-year students until the first day of classes. Click the ">" on the left-hand side to see a description of that course's Notes.
